

Laptop/Tablet/Phone/Mobile electronics repair agreement.

People's technicians work diligently to make repairs without cosmetic damage, however, during repair of mobile electronics it is possible there will be cosmetic damage as a result of the manufacturing techniques used when manufacturing mobile electronics. Damage may include visible scratches or marks, misaligned panels, and in some cases evidence of glued parts. Any repair that requires panels to be removed or cracked open, including screen replacements, cable replacements or other repairs that require accessing internal compartments will be subject to some cosmetic damage. Peoples reserve the right to determine what minor or moderate cosmetic damage is.

I agree to accept minor to moderate cosmetic damage resulting from repairs made by Peoples technicians, on my mobile device. I understand that due to the manufacturing process of mobile electronics that cosmetic damage may occur during repairs.
