Upgrade to Faster Internet and Make The Whole House Happy

Look around the rooms of your house and take note of all the Internet-connected devices they contain. Your list may include computers, tablets, smartphones, smart TVs, Blu-ray disc players, video game consoles and streaming media set-top boxes. Now think about all the online activities taking place simultaneously on a typical day in your house, such as streaming music and HD movies, downloading software and apps, uploading photos, playing video games and enjoying video chats.

Add everything up and there's an excellent chance that your household is using significantly more broadband than it did even a year or two ago. Many Peoples customers are saturating their bandwidth because of increased usage, and this can make it seem as though their Internet service is running slow when it's actually being maxed out. If this is the case in your household, you may be experiencing annoying slowdowns such as video buffering.

Fortunately, there's a quick way to solve this problem. Simply upgrade your Internet plan to one with higher speeds. Peoples now offers a variety of competitively priced plans with speeds up to 100 Mbps download and 10 Mbps upload. Peoples is also excited to now be offering 1 Gig Internet service to both residential and business customers.

According to the Federal Communications Commission (FCC), nearly 30 percent of Americans are now opting for 25 Mbps service, which is up from 7 percent in 2011.¹ The pace of life is definitely speeding up!

For help determining which Internet plan best fits your household's current usage, call Peoples today at (913) 757-2500. Be sure to ask about the option of money-saving bundles including Internet.
